SetTime

to synchronize the time of recording pen with

that of the computer, the newly recorded files will display accurate time same with that displyed on the computer.
da sinhronizirate čas snemanja s tistim v računalniku,
bodo na novo posnete datoteke prikazale točen čas, ki je
enak kot na računalniku.

4. If errors occur, please remove the recording pen, and check other USB devices, and then plug in the recording pen, and wait for 5 seconds to repeat the above operation.
4. Če pride do napak, odstranite usb in preverite druge
naprave USB, nato pa priključite snemalnik in počakajte
5 sekund, da ponovite zgornjo operacijo.

Note: time to change the time in the tool with the time and date of the computer synchronization, to change the time can only change the time on the computer time

OPOZORILO: da spremenite čas v orodju s časom in datumom računalniške sinhronizacije, če želite spremeniti čas, lahko spremenite le čas v času računalnika

Note: some computer antivirus software will indicate as virus, please note that Hardware.dll 5.34.5.0 Hardware   SetDigitRecorderTm SetUDiskTime Mic... **are not virus, and antivirus software give false alarm. Contact after-sales service personnel if you delete the files by mistakes.**

If the security guard prompts to stop operation, please select "allow" option.

Opozorilo: nekatera računalniška protivirusna programska oprema bo označila USB kot virus, upoštevajte, da niso virus, in protivirusna programska oprema daje lažni alarm. Obrnite se na servis, če datoteke izbrišete z napakami.

Če varnostni sistem pozove k prenehanju delovanja, izberite možnost »omogoči«.

Remarks:

When the machine shuts down due to low power, the time will be reset, please connect it to the computer to reset the time.

It is recommended to copy the files on the desktop, so as to prevent those stored in recording file from deleting by mistake.

Ko se USB izklopi zaradi nizke porabe, se čas ponastavi, povežite ga z računalnikom, da ponastavite čas. Priporočljivo je, da kopirate datoteke na namizje, da preprečite, da bi se datoteke, shranjene v snemalni datoteki.
